

FENWARE HSEQ Health, Safety, Environmental, and Quality

Fenware HSEQ was designed with the assistance of HSE professionals to handle the recording, reporting, and analytical requirements vital in today's industry. This software application allows you to record and analyze incidents (personal, vessel and vehicle), vessel visits, employee behavioral-based safety assessments, and corrective action requests while giving you the ability to identify trends and at-risk areas within your organization.

Fenware's HSEQ application is industrial strength software which was designed specifically to meet the needs of the oilfield and marine industries. Our application was architected using Microsoft's flagship database products Microsoft SQL 2008 and Microsoft Office 2007/2010.

Running Your Business Is a Whole Lot Easier With Fenware HSEQ

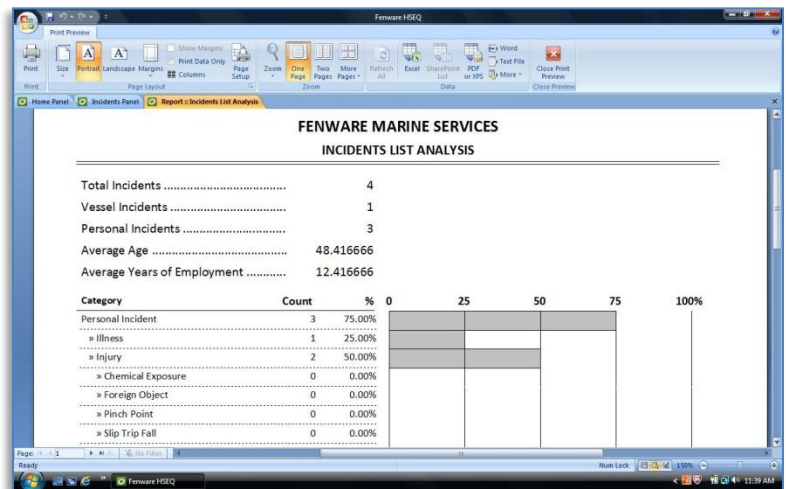

Fenware's HSEQ application provides a robust and effective solution for:

- **CUSTOM FILTERING AND REPORTING**
 - Able to easily create custom filters and print reports based on your criteria.
- **USER CONFIGURABLE DASHBOARDS**
 - Select from a number of pre-defined dashboards to highlight critical operational data at a glance.

Full Security and Record Auditing

Fenware went through the pain-staking task of making certain that our personnel application meets the requirements of your management and security departments by including full data audit logging and administrator assignable user security. In other words, you can decide who has the ability to read, insert, update, or delete records within each section of the application. Furthermore, you can see by whom and when changes were made.

Who Is Fenware Development ?

Fenware Development, LLC is located within the heart of the southern commercial maritime and oilfield industries in Houma, Louisiana. Our team of developers has over 30 years of combined experience developing Microsoft Windows™ compatible software applications. We also have real world experience having worked as deckhands, yardhands, and slabhands for local marine and oilfield companies. Our successful track record of developing and implementing solid corporate software solutions make Fenware Development an ideal choice to assist your company in meeting its software needs.

Why Should I Do Business With Fenware ?

Fenware fully stands behind its products with a 90-day satisfaction guarantee plus our Fenware Bug-Free GuaranteeSM. What other software company is willing to give you this level of assurance?

So What's The Price ?

Fenware Development believes in forming long-lasting relationships with our clients; therefore, we are willing to work with you on different pricing and licensing options to meet your company's size and budget.
